In school, 100 points can get you an A+

In Flex Path, 100 points can get you $1,500 back!

Flex Path

Flex Path is a new Energy Upgrade California option offered by LA County that gives you a flexible way toward a more comfortable, energy efficient home.

Flex Path is separate from the Basic and Advanced upgrade options, and it provides a new way to customize your upgrade to meet your budget.

To receive an incentive, just choose two or more qualifying energy efficiency measures on the reverse side with a combined point value of 100 or more, and have them installed by a Participating Contractor.

This program is available for a limited time. More information can be found at the website address below.
