Energy Upgrade California is a partnership of the California Energy Commission and the California Public Utilities Commission.

Energy Upgrade California in Los Angeles County is an alliance among Los Angeles County, Southern California Edison and Southern California Gas Company. This program is funded in part by grants from the California Energy Commission and by California utility customers and administered by Southern California Edison and Southern California Gas companies under the auspices of the California Public Utilities Commission. This program may be modified or terminated without prior notice and is provided to qualified customers on a first-come, first-served basis until program funds are no longer available. Los Angeles County, Southern California Edison and Southern California Gas Company are not responsible for any goods or services selected by the customer. The trademarks used herein are the property of their respective owners.

High utility bills?

Get up to \$4,500
for energy efficiency
improvements!

Improve your home. Get rebates. Save money.

Get a professional “Whole House” Solution

Many homes leak hot air in the winter and trap heat in the summer, making us crank up the heat or air conditioning to be comfortable. It's like watching hard-earned cash fly out the doors, windows and ceilings of inefficient houses.

For example, if your house is hot and stuffy and you think you need a new air conditioner, you can seal and insulate your house first to keep the heat out. Think of your house as a complete system working together—a “whole house”—rather than individual elements. You'll save on air conditioning bills and may even need a smaller new unit than you had before.

When sealing and insulating your house, your Energy Upgrade California contractor can also identify ways to save more energy and get more rebates for:

- Wall insulation
- Energy-efficient heating and air conditioning systems
- Energy-efficient windows
- Cool roofs
- Whole house fans
- High-efficiency storage gas or tankless water heaters
- Energy-efficient hardwired interior and exterior lighting fixtures
- Other energy-efficiency improvements that are permanent to your house

Keep your cool with energy-efficient windows.

Save energy with efficient heating and cooling systems.

Stop leaks with sealing and insulation.

Save water and energy with low-flow showers and high-efficiency storage gas or tankless water heaters.

The “whole house” approach can result in:

- Reduced utility bills
- Improved building comfort
- Enhanced indoor air quality
- Reduced impact on the environment

Why Upgrade Now?

Rebates Now Available!

Your rebate or incentive depends on how much energy your improvements save. You can receive:

- Up to \$1,000 for basic sealing and insulating.
- Up to \$4,500 for more extensive upgrades.
- Additional rebates and incentives available for specific upgrades—ask a participating Energy Upgrade California contractor.
- Rebates and incentives may vary depending on utility provider.
