DEMOLITION OF A GUNITE SWIMMING POOL/SPA

1. Provide 2 – 24” x 24” drain holes at the bottom of the pool.
(More holes may be required depending on the size of pool).
2. All coping must be removed.
3. Remove skimmer and plumbing to pool equipment.
4. Remove and disconnect all electrical to pool equipment.
5. Inspection is required before the pool/spa is filled.
6. The pool/spa must be filled in with sand, gravel
(no larger than 1 1/2”) or dirt (compacted to 90%).
7. A certified compaction report is required from a
licensed soil’s engineer.
